## Software Requirements

Operating System: Windows® NT, Windows® 2000,  
Windows® XP Professional  
Memory: 32 Mb  
HDD: 5 Mb  
Software: MS Excel®, IE 5.5 (Minimum)

## Installation

The installation disks are set up to *autorun*. If the computer does not allow *autorun*, browse to the CD and click TNAPro.exe.

You will be prompted to enter your details and the CD License Key. The CD Key details have been provided to you on the back of Installation and Start Up Guide.

During the installation wizard you will be asked for the location to load the program files.

The program will auto create a virtual directory on the server or in the Internet Information System if not running on a server.

This product is specifically designed to run on a server, but can run on a stand alone PC if a personal web server is installed on that PC.

## Customisation

TNA-Pro® can be customised to suit the owner's specific requirements.
